

BIKINI

An early and healthy triticale with a great productivity

- ➔ Triticale combining alternativity and productivity
- ➔ Possible sowing until mid-april in northern europe countries
- ➔ Excellent yield potential and very high specific weight
- ➔ Great disease profile, in particular towards powdery mildew and yellow rust
- ➔ Good lodging resistance

PRODUCTIVITY

- Excellent yield potential
108.45 % better than the french official standards

108.4%
better than standards

	Untreated	Treated
2014	106.3	105.5
2015	106.9	113.9
Overall average	108.45 %	

Results expressed in % of the french official standards*

QUALITY

- Very high specific weight: 103.4 % better than the french official standards*
- Very high protein content : close to 110 % better than the french official standards

* 2014-2015 control varieties: Kaulos+Tribeca+Orval/3

Breeder	Lemaire Deffontaines
Listing	France - October 2015
Origin	Bienvenu x Triptic
CTPS code	LD 20-2

CHARACTERISTICS

Alternativity : Alternative (8)	●●●●●●●●
Heading Precocity : Early (7)	●●●●●●●
Height : Medium-high (6.5)	●●●●●●●
Lodging resistance : Medium-high (6.5)	●●●●●●●
Frost resistance : Medium-high	●●●●●●●

DISEASE RESISTANCE

Powdery mildew : High (7)	●●●●●●●
Yellow rust: Very high (8)	●●●●●●●●
Brown rust : Medium-high (6)	●●●●●●●
Eyespot : Medium high (6)	●●●●●●●
Septoria : Medium high (6)	●●●●●●●
Rhynchosporium : Medium (5)	●●●●●
